Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 35-39, drawn to a method of determining neuro-muscular response onset values, classified in class 600, subclass 554.
- II. Claims 15-35,40 and 41 (assuming claim 20 should depend from claim 15 since it lacks any antecedent basis to claim 7), drawn to a method of detecting presence of a nerve, classified in class 607, subclass 117.
- III. Claims 42-46(noting that claim 45 has erroneously been numbered as 425), drawn to a method of determining status of a spinal nerve, classified in class 607, subclass 117.
- IV. Claims 47-50, drawn to a method of determining the location of a surgical probe relative to a spinal nerve, classified in class 600, subclass 554.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I,II,III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of groups II,III and IV have separate utility such as evidenced by the fact that the onset values do not have to be obtained using the method of claim 1. See MPEP § 806.05(d).

Likewise groups 3 and 4 obtain different results in different ways; with claim 42 obtaining the status of a nerve and claim 47 obtaining the relative location of a probe in relation to a nerve.

Art Unit: 3744

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C Doerrler whose telephone number is (703) 308-0696. The examiner can normally be reached on Monday-Friday 6:30-4:30.
